

Degussa Goldhandel Group

## The number one expert in gold and precious metals

Europe's largest precious metal trader, Degussa Goldhandel Group, has its show-rooms in Zurich and Geneva with the most diverse range of bars and coins made of gold, silver, platinum, palladium, rhodium, ruthenium and iridium. Degussa is represented internationally in Germany, London and Madrid. In addition to traditional Degussa bars, numerous international investment gold coins are on offer. All investment and gifts products are also available online at [degussa-goldhandel.ch](http://degussa-goldhandel.ch).

### Quality and trust

For anyone who decides to invest some of their assets in precious metals, the quality of the products should be given top priority. All Degussa bars have the highest possible degree of fineness and are offered in various weight ranges from 1 gram up to 1 kilogram. The world's most popular investment coins, for example the Krugerrand from South Africa, or the Vreneli from Switzerland, are of course also offered in the Degussa range, as well as a large selection of over 100 investment coins.

All of Degussa's investment products are certified by the international trade organisation London Bullion Market Association (LBMA) and bear the 'Good Delivery' seal of quality. In addition, the company is a member of all major international precious metals associations and trade organisations.

### Secure storage, always available

Anyone who owns bars or coins is confronted with the question of storage. For the safe and discreet storage solution for precious metal, important documents or other valuables, Degussa offers numerous safe-deposit boxes at the highest safety standards.

In addition, Degussa also offers storage of white metals – i.e. silver, platinum, palladium, rhodium, iridium and ruthenium – in the customs free warehouse. This is where VAT is charged only when the metal is actually physically delivered.

### More than bars and coins

As gold is not exclusively an investment for Degussa, but also a highly emotive issue, the company additionally offers a range of fashionable accessories and lifestyle products with a comparatively high precious metal content. For example, watches, cufflinks or money clips, as well as a chess game made of 3.8 kilograms of silver.

The Degussa watches have such a high precious metal equivalent value, which is rarely the case with any other maker. The Krugerrand watch, for example, consists of an original Krugerrand gold coin and contains a total of 70 grams of fine gold, about 2.5 ounces! The unique Degussa animal sculptures made of silver are also a very beautiful gift idea.

With the Degussa products, it becomes clear that the 'gold' fascination has always appealed to both the mind and the emotion.
